PHASE 3

Installation and Setup

Installing, configuring and running ComicCraft

COMICCRAFT • AI COMIC STORY CREATOR • TECHNICAL DOCUMENTATION

1. Installation & Setup

1.1 Windows (PowerShell)

```
cd path\to\ComicCraft
python -m venv .venv
.venv\Scripts\Activate.ps1
pip install --upgrade pip
pip install -r requirements.txt
```

If activation is blocked by the execution policy:

```
Set-ExecutionPolicy -Scope Process -ExecutionPolicy RemoteSigned
.venv\Scripts\Activate.ps1
```

1.2 macOS / Linux

```
python3 -m venv .venv
source .venv/bin/activate
pip install -r requirements.txt
```

1.3 Optional: Local Stable Diffusion

Only required when IMAGE_PROVIDER=stable_diffusion. CPU-only machines can run it, but a single panel may take several minutes; the first run downloads several gigabytes of model weights.

```
pip install torch --index-url https://download.pytorch.org/whl/cu121
pip install diffusers==0.31.0 transformers==4.46.3 accelerate==1.2.1 safetensors==0.4.5
```

1.4 Configure the Environment

```
Copy-Item .env.example .env
notepad .env
```

1.5 Run the Application

PowerShell / Terminal

```
uvicorn app.main:app --reload
```

or:

```
python run.py
```

Then open:

- Application — http://127.0.0.1:8000
- API documentation (Swagger UI) — http://127.0.0.1:8000/docs

- Health check — http://127.0.0.1:8000/health
