PHASE 4

HTTP API Reference

Endpoints with example request and response

COMICCRAFT • AI COMIC STORY CREATOR • TECHNICAL DOCUMENTATION

1. HTTP API Reference

Method	Path	Purpose
GET	/	Landing page and comic creation workspace
POST	/generate	Form submission → renders the comic preview
POST	/generate-comic/json	JSON API → structured comic payload + PDF URL
GET	/export-success	Export confirmation page
POST	/test-image	Developer utility: single image from a raw prompt
GET	/download	Streams an exported PDF (path-traversal guarded)
GET	/health	Health and configuration probe
GET	/docs	Interactive Swagger UI

1.1 Example Request

cURL

```
curl -X POST http://127.0.0.1:8000/generate-comic/json \
  -H "Content-Type: application/json" \
  -d '{"story_prompt":"A brave fox discovers a mysterious portal inside an enchanted forest.",
       "character_name":"Finn","setting":"Enchanted Forest",
       "tone":"Adventure","art_style":"Comic Book"}'
```

1.2 Example Response

JSON

```
{
  "success": true,
  "title": "Finn and the Whispering Portal",
  "character_name": "Finn",
  "setting": "Enchanted Forest",
  "tone": "Adventure",
  "art_style": "Comic Book",
  "panels": [
    {
      "panel_number": 1,
      "title": "The Forest's Edge",
      "scene_description": "...",
      "caption": "...",
      "narration": "...",
      "dialogue": ["FINN: Here we go."],
      "image_prompt": "...",
      "image_url": "/static/panels/..._panel_1.png"
    }
  ],
  "pdf_url": "/static/exports/..._20260923_120000_ab12cd.pdf",
  "warnings": []
}
```
